EXPERIENCE

2022 - PRESENT — **Software Developer Intern**
Kowi

2021 - 2021 — **Front-End Developer Intern**
Mathrithms

PROJECTS

2021 — **Full-Stack MERN Blogging Platform**
Personal Project

It is a clone of dev.to website. I made this using MERN technologies.

2021 — **Worthpad DeFi**
Freelance Project

I built their front-end part using nextjs and tailwind. And client was extremely happy about the work.

2021 — **Subira 2.0 - Document Signer**
Internship Project

I built their front-end part using React, Redux and tailwind. I also did API integration using axios and redux async actions.

2022 — **Ethereum Transfer Dapp**
Personal Project

I built a ethereum transfer dapp, It can transfer ethereum without any middle person like bank. I used Next.js, tailwind, Solidity and Ethers.js to built this dapp.

POSITION OF RESPONSIBLITIES

2022-PRESENT — HackOverflow Society Tech Team Member

2020-2021 — Developer Student Club, Chandigarh

ABOUT ME

I'm a Front-End Developer based in Bareilly, India specializing in building exceptional digital experiences. I enjoy using my skill-set to empower people to accomplish their goals.

I create lighting fast WebApps and Websites using MERN Stack with the help of NextJS.
